Guest speakers

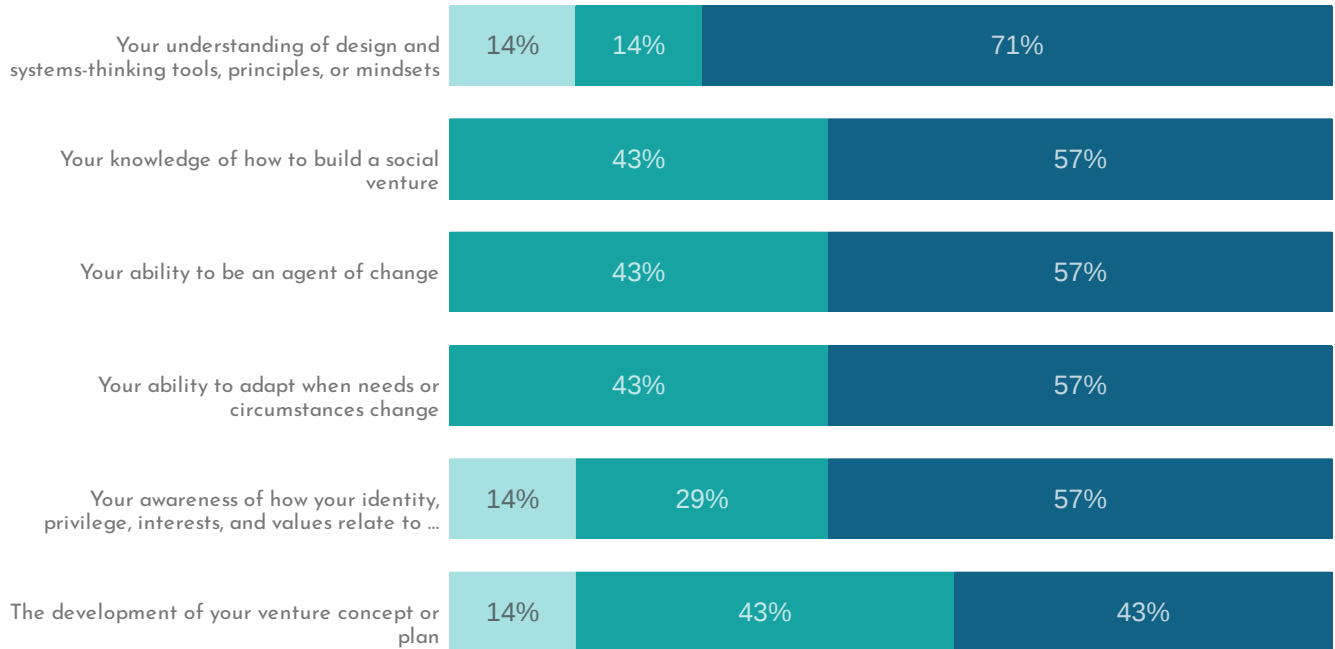

Workshop content

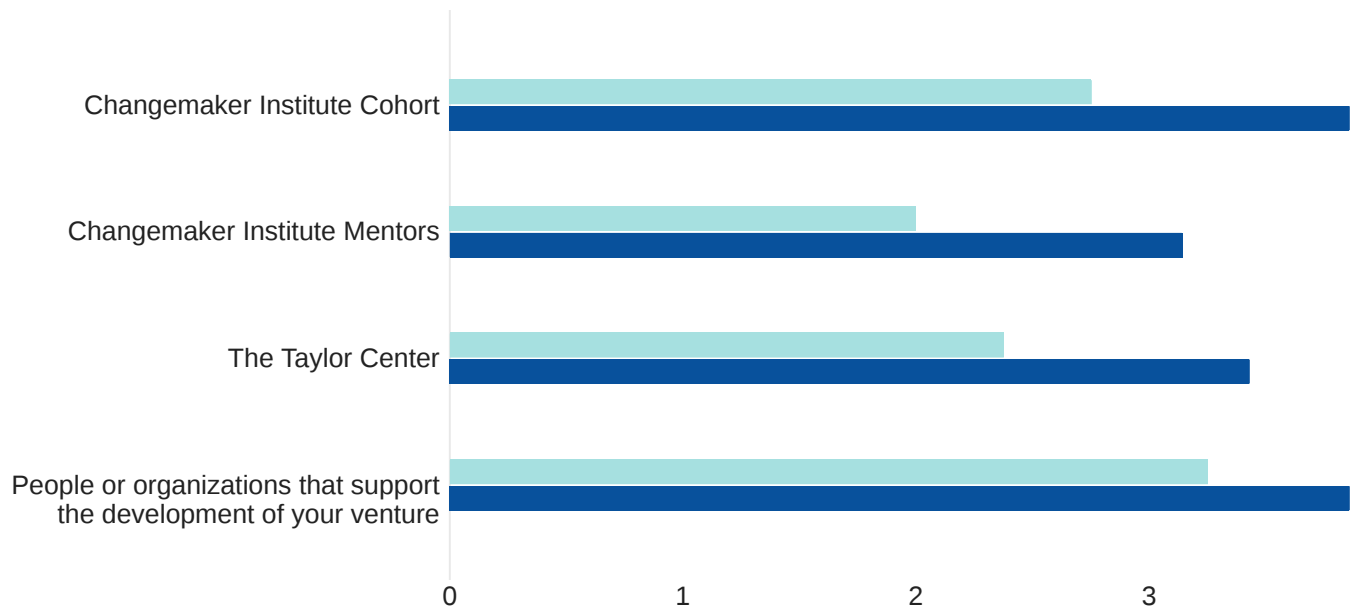

How much has this experience impacted ...

● No impact ● Small impact ● Medium impact ● Big impact

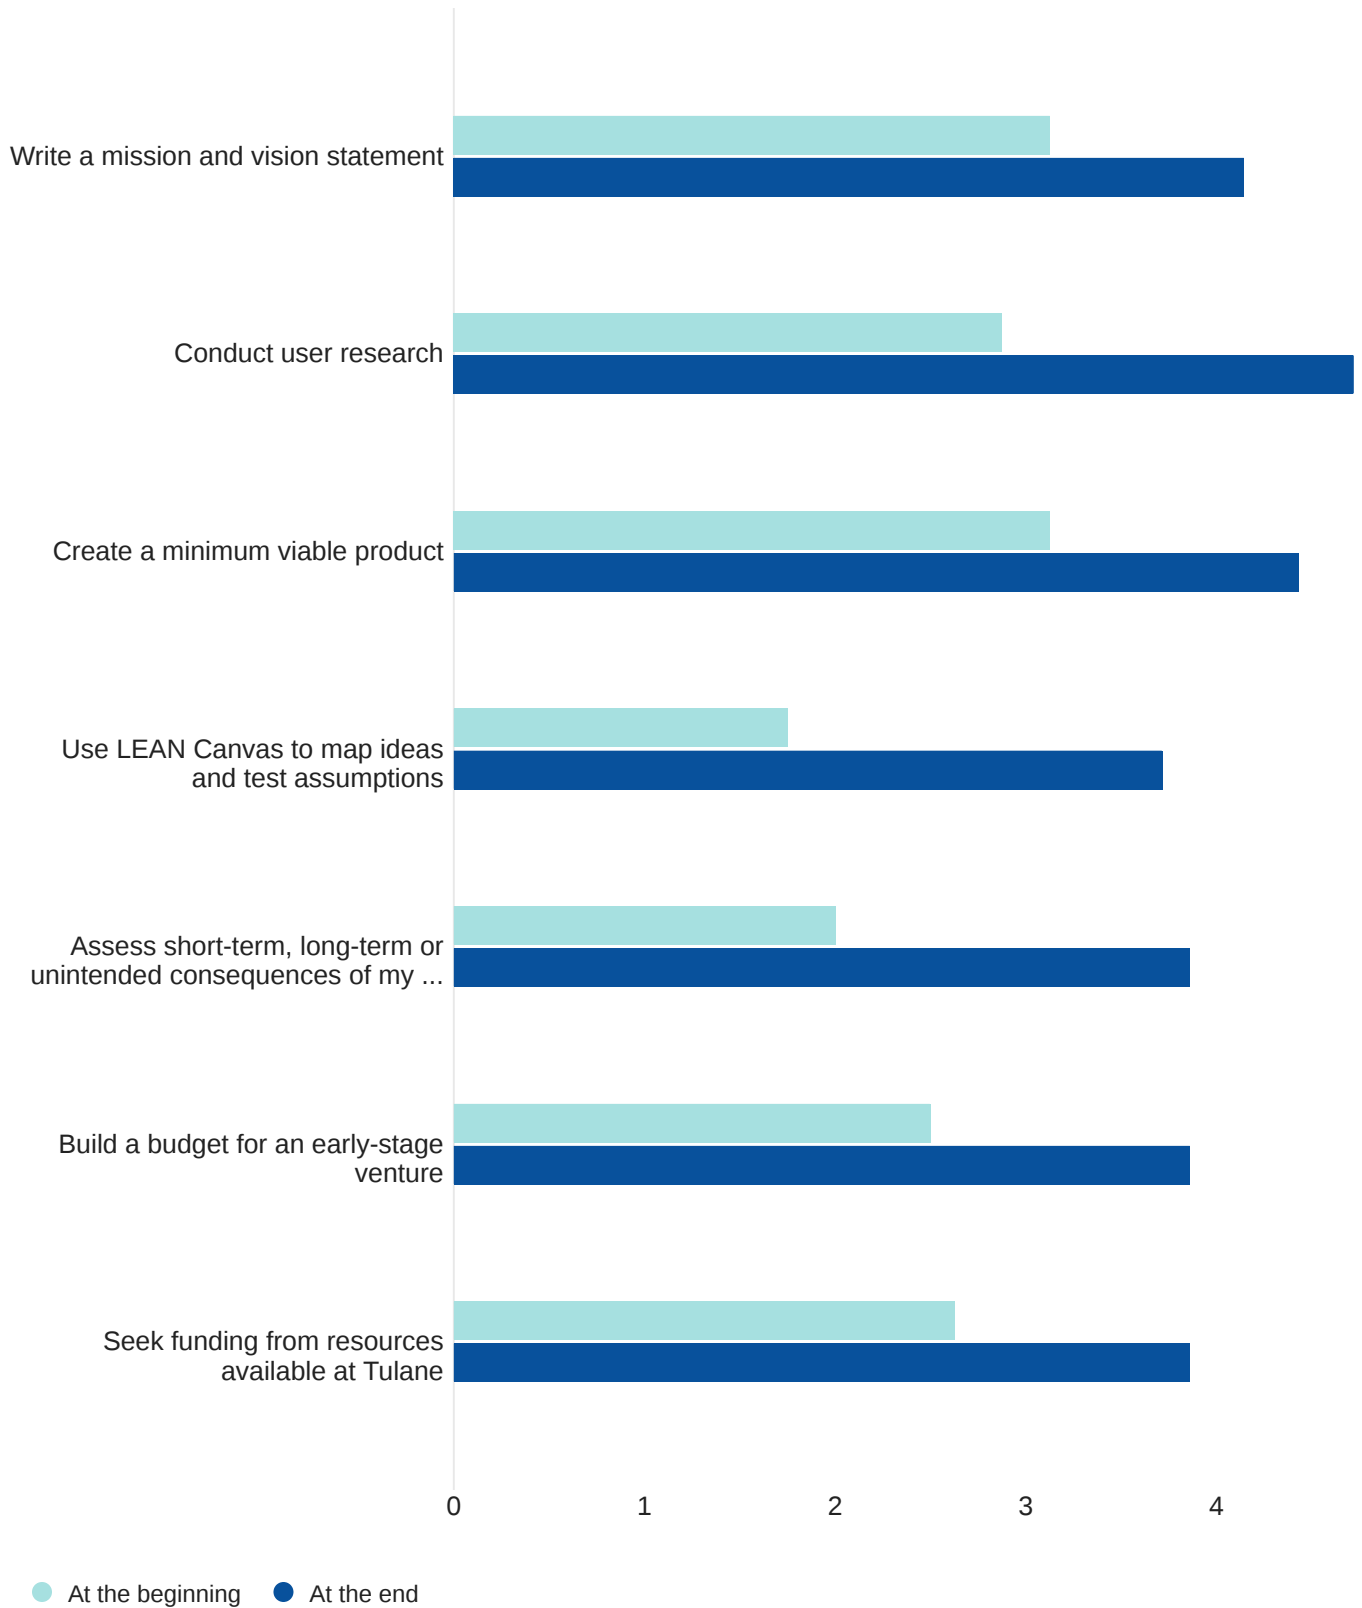

How connected do you feel to the following:

0=not connected 5=very connected

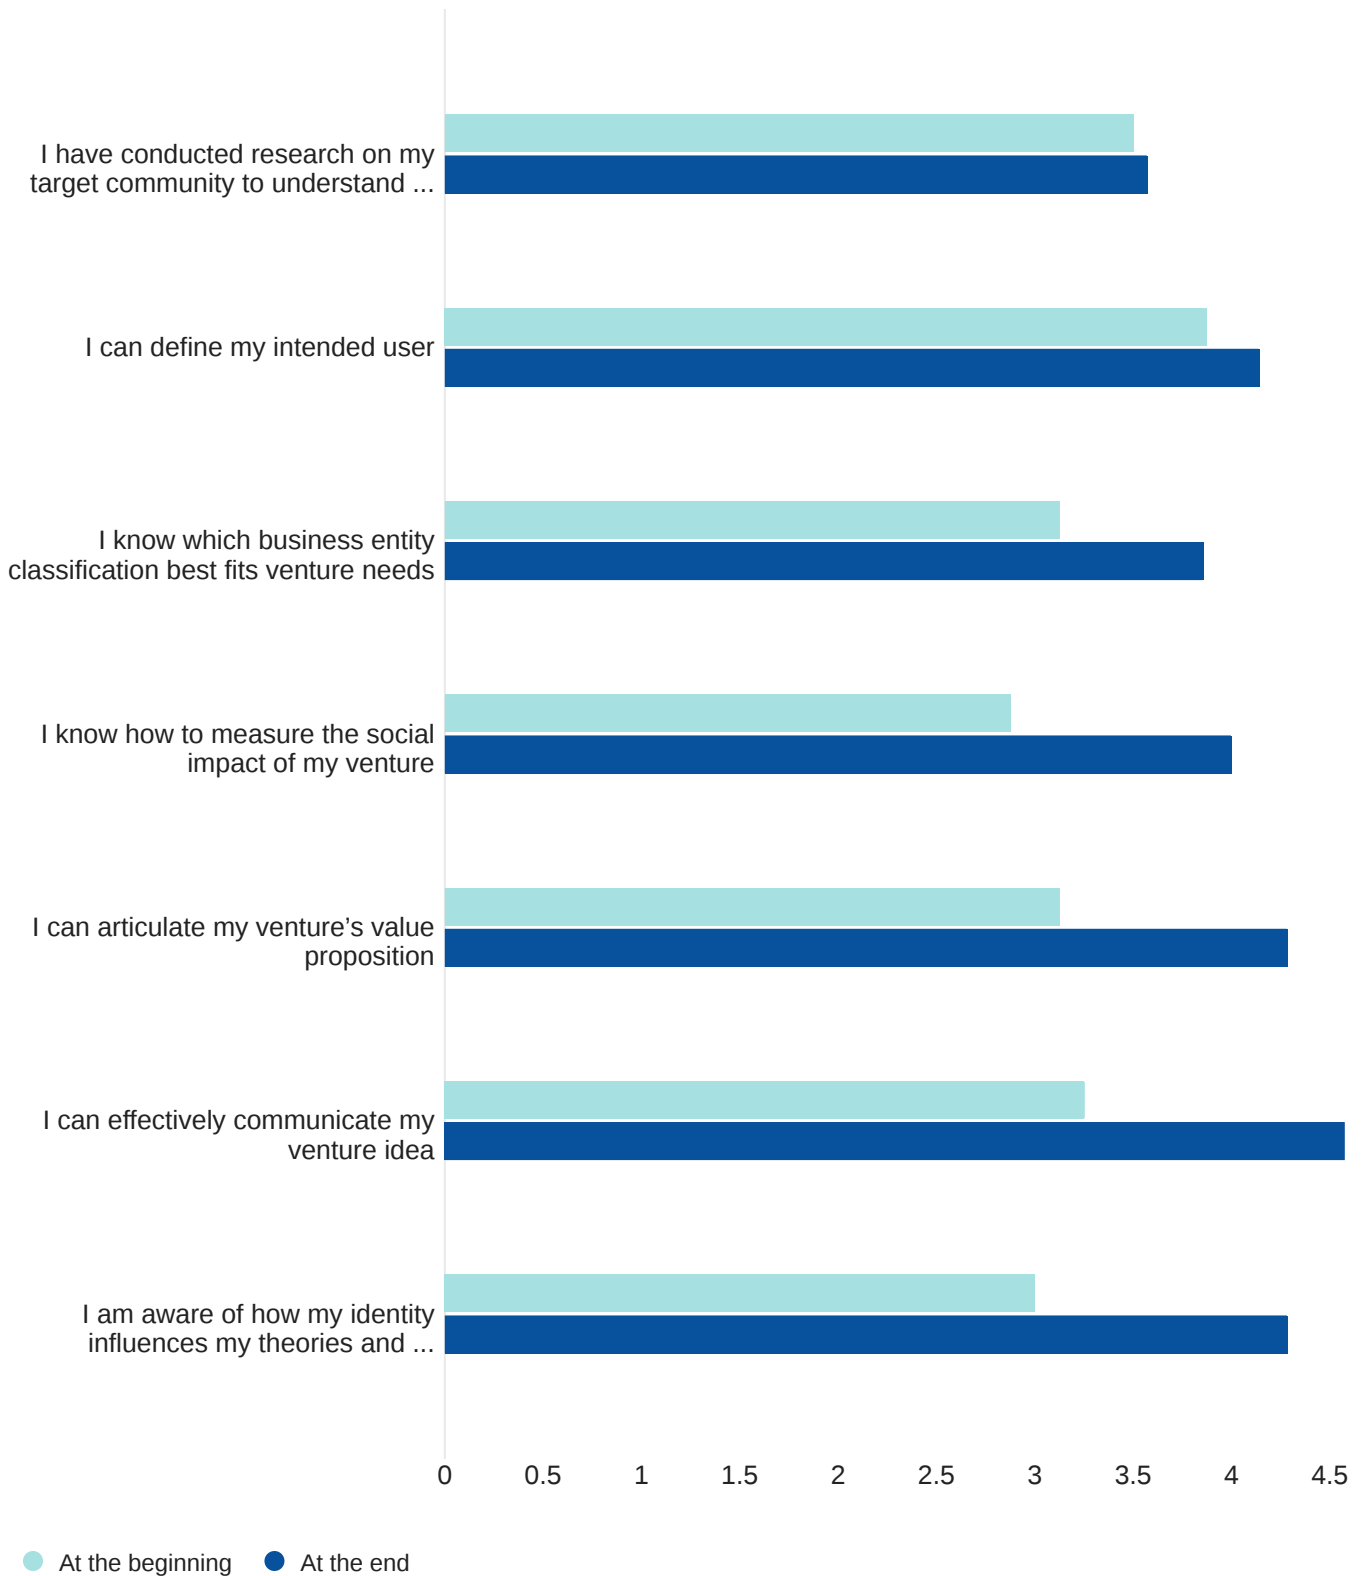

● At the beginning ● At the end

How knowledgeable are you about how to:
 0=not knowledgeable 5=very knowledgeable

How much do participants agree or disagree with the following statements:
 0=disagree 5=strongly agree

Did anything have a strong positive or negative effect on your Changemaker Institute experience? Please explain.

Did anything have a strong positive or negative effect on your Changemaker Institute experience? Please explain.

I think the guest speakers made a strong positive impact as well as Julia's help. Julia was always available to provide feedback or talk through any issues that may have arisen.

Julia Lang was a joyful, informative, and productive leader. She was flexible but also kept us on task. It's been an absolute pleasure being a part of the program!

The regular meetings and the open critique on my business plans.

The entire experience has been positive. The attention to detail and real world experiences are priceless.

I thought the program overall had a positive impact on my general understanding of social innovation and entrepreneurship outside of the bubble specific to my organization.

If you are willing to share a testimonial or experience about CI for us to share via communication channels, please provide below:

CI provided us with a level of support that allowed us to take risks and expand our network as we explored and developed our venture,

Being a Changemaker Fellow was a positive and important experience. In addition to learning a lot, it was motivating to feel a part of this particular entrepreneurial community that can relate to wanting to "do well by doing good." I loved being a part of the group, learning from each other, supporting one another, and Julia's leadership and warm engagement in every class motivated us to connect and do well. I'm really thankful for the opportunity I was given to be a CI Fellow!

Yes.. Feel free to email me..

The Changemaker Institute has provided me with the tools necessary to be successful as an entrepreneur.

2023 Changemaker Institute (CI) Fellows

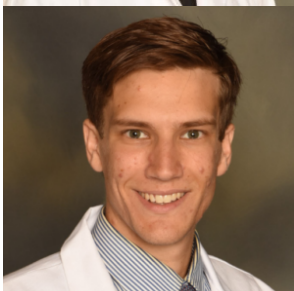

RoboRecovery is a 501(c)(3) nonprofit that catalyzes pathways into science, technology, engineering, and mathematics (STEM) for underserved students in New Orleans. We envision an equitable future for STEM education, where all youth have access to hands-on opportunities in STEM and can become future leaders in STEM. Through after-school and in-school educational robotics programs at local schools and after school organizations, we are empowering the next generation of innovators from New Orleans—one robot at a time.

William Bai, *School of Science and Engineering*

New Orleans Free Health Resource App will increase awareness and access to charitable healthcare resources in New Orleans by creating a user-friendly website for patients and medical providers to consolidate and organize all available resources. This will increase utilization of free screening services for common diseases such as diabetes, heart disease, and cancer, which may lead to earlier detection and decreased mortality in the New Orleans population

Opportunity Medical is a student lead start-up that is dedicated to unleashing the potential of unmatched medical school graduates. The companies' mission is to integrate this hidden workforce by helping these doctors to obtain alternative licensure and develop in-demand medical skills. The company also seeks to help alleviate the shortage of healthcare providers by creating alliances for physicians to obtain employment commensurate with their level of education and ability.

Darrin Miller, Tulane SPHTM Environmental Health Sciences; Industrial Hygiene

Piper Biotech is an oncological pharmaceutical sensitivity and resistance testing service that empowers patients and their doctors in drug selection by testing drugs on a patient's unique tumor sample outside of the patient's body. This service seeks to quickly identify the optimal pharmaceutical option and prevent exposing the patient to a trial-and-error treatment process, which can place a physical, emotional, and financial burden on cancer patients.

Pinpoint Framework is an innovative approach that employs the City Health Dashboard data as a metric, tracking, and information tool, which will equitably pinpoint specific locations for resources to assist in prevention and recovery efforts. This innovation seeks to be an emergency management tool that will assist with unprecedented events such as chronic illnesses and addictions, destructive weather patterns, and biological and man-made disasters. As MPA students, we are driven to engage public officials to improve community conditions for vulnerable populations
